

AUTHOR GUIDELINE

Article arrangement and style

The text file should be arranged as follows:

1) The title page should contain:

- the full title (bold, sentence case, font size 14, aligned central)
- name(s) of (co)author(s) (i.e. Julius Kola Oloke)
- address(es) (aligned central),
- corresponding author's e-mail address
- proposed running title
- an abstract of 150-250 words which should summarize the objective(s), major findings and conclusions up to six keywords (not repeating the title)

2) The next pages should contain the text file divided into: Introduction, Materials and Methods, Results and Discussion, Acknowledgements, References, Tables and Figures. Hierarchy of subsections in the text body must be clear. First-order headings (e.g., Introduction, Materials and Methods) and second-order headings are in bold (e.g., Sampling procedure); third-order headings bold headers are in italics (*Phenolics determination*).

Referencing in the text: In the text references should be cited according to the following examples: Oloke (2006), Oloke and Adetunji (2005), (Oloke, 1996 a, b), Oloke et al. (1986), (Oloke et al., 1986). References cited in group should be arranged from the earliest to the most recent year (e.g.: (Oloke, 2005; Oloke and Adetunji, 2006; Oloke et al., 2007)

References List: References should be listed alphabetically with names of journal written in full and italicized with colon and full stop as indicated. For example:
Oloke, O.C. and CO Adetunji (2020) Analysis of Microbial exogenetic materials from phizum. *PCU Journal of science and technology* 124: 12-21.

For Books:

Chapter in a book:

Published proceedings paper:

Manuscripts should conform to standard rules of English grammar and style. Conciseness in writing and accuracy of grammar are major assets.

Formatting guidelines:

Rule of good scientific practice and Responsible authorship

It is the policy of *the proposed journal* that all the authors must conform to standards of good scientific practice and responsible authorship. Submitted articles will be double-checked to ascertain authenticity. All of the authors must accept responsibility for the entire contents of the submitted manuscript, and provide their significant contributions to the work. Honorary authorship is not allowed, i.e., authorship should not be awarded to people who made no intellectual contribution to the work, or who were not physically involved in conducting the research. Individuals who supported the research by providing laboratory space, equipment or financial support should be recognised in the Acknowledgements only.
